Subject: CONFIDENTIAL state plans preamble
Section VIII EO 12866 CPP 2060 AR33 Final 20150529.docx
comparison chart revised -- tracking and corrective action.docx

Hi all,

I think having this at your fingertips in its entirety will help you help us complete our TSD properly. Please note, things are still changing but at least you'll have a full picture of what is required under state plans. A comparison chart also shows how things will be handled in terms of timing. This will also help you respond to the handful of comments that are currently 3rd on the priority list.

We are not interested in any opinions or comments related to the preamble, only your advice on technical aspects of producing a TSD for projecting CO2 performance. Only read the sections as applicable to this assignment so it doesn't slow down your deliverable timing.

As a next step, you all are producing a table with required assumptions for each type of state plan and reasonable resources/references for the basis for those assumptions.

Best,

Robyn (Kenney) DeYoung
